We had a problem of water leakage in our property which we were unable to solve because not being able to identify the origin of leakage. In a blind exercise, we would have broken the walls and floors at many places to do the elimination process. Because of so many unknowns and cost of breaking and repairing, we did not take any action for months. However, when we came in contact with Atulbhai Doshi of “Classic Solution”, Franchise of “MACI – A BUYER’S CHOICE” company and understood the technology and reports provided by the company, we immediately gave the work. The company has its own method and processes and reports with clear recommendation are provided. Our long standing problem of leakage was solved with minimum breakage.

Though “Classic Solution” is Rajkot based company, we have experienced them providing world class technology backed solution with very reasonable rates.
